WORK EXPERIENCE

The Rockefeller Foundation **New York, NY**

Director, IT Operations and Services Management **Nov. 2024 – Present**

- Managed $6.4M budget, realizing 11% cost saving year-over-year through the identification and elimination of underutilized services, renegotiating bloated contracts, and optimizing cloud infrastructure configurations.
- Established and executed the technology strategy of our public charity, RF Catalytic Capital, enabling the rapid and repeatable process of funding, operationalizing, and spinning-off projects with scalable and cost-efficient IT.
- Deployed Claude Enterprise to all US staff, reaching 91% weekly active use, by building a single automated provisioning path for licensing, usage limits, the desktop app, and Office add-ins, and co-designed and delivered the all-staff training that drove adoption.
- Built an Azure-hosted compliance service that evaluates every Claude prompt in a 300-seat org against AI Usage Policy rules, about 750,000 requests a month, and rejects requests in violation of policy. Further re-architected the classifier to cut cost from $322 to $13 a month with no loss in detection.
- Built and lead an AI governance program: a monthly council with the COO and Chief People Officer that sets AI priorities, controls, and spend, and 20 departmental AI Ambassadors who build AI fluency across their teams and bring enterprise use cases to the council.
- Led an in-house, enterprise-wide migration from Box to OneDrive and SharePoint using AI-developed migration tools and agents that monitored progress, avoiding an estimated $207k in consultant costs, eliminating $130k in duplicative software spend, and establishing new knowledge management guidance.
- Led IT workstreams for the modernization of our grantmaking platform to Salesforce and ERP to Oracle NetSuite, owning integrations, data migration, and access controls to improve reporting accuracy and audit readiness while retiring legacy systems.

IT Services Manager **Oct. 2020 – Oct. 2024**

- Managed and trained a global team of support engineers, efficiently resolving over 1000 monthly service incidents with an 85% first time resolution (FTR) rating.
- Consolidated disconnected ticketing systems into a single Salesforce case management platform, capturing 20% more incidents that had gone unreported and giving leadership a full view of team workload.
- Managed SSO and SCIM provisioning for ~40 applications across Okta and Microsoft Entra ID, automating workflows so new hires start with least-privilege access and departing staff lose access to every app the moment they're offboarded.
- Lead cloud modernization efforts focused on right-sizing compute resources and automating data retention, resulting in a 21% decrease in yearly cloud spend across Azure and AWS.
- Coordinated with peer departments to establish and enforce a technology procurement policy, allowing the Foundation to identify and eliminate duplicative and insecure “shadow IT” while ensuring staff still had the tools necessary to excel.

Ventucom **New York, NY**

Systems Support Engineer **Nov. 2016 – Oct. 2020**

- Managed configuration, policy, and application deployment for 1000+ devices across a mixed Windows and macOS fleet, using JAMF for macOS device management and Intune for Windows endpoints.
- Wrote PowerShell tooling for repeatable tenant tasks (bulk user provisioning, license assignment, mailbox permissions) so onboarding a new client ran from a CSV rather than a click-through.
- Cut email-spoofing risk across multiple MSP clients by auditing unverified sending domains and implementing DKIM and DMARC DNS records.

Medgar Evers College, CUNY **New York, NY**

Technology Specialist **Sept. 2015 – June 2016**

- Provided IT support for the college career office as the primary point of contact for every technical issue, keeping the office's systems and staff running through the academic year.

EDUCATION

Certifications: Certified Information Systems Security Professional (CISSP), ITIL 4

Education: B.Sc., Information Systems, Brooklyn College, CUNY (2013 – 2016)
